Frontier Technologies Celebrates 20 Years in Business

Halifax, NS - June 29, 2017 - From three employees to over 150 and from local to national, Frontier Technologies has consistently grown and remained at the forefront of innovation over the last 20 years.

This well-respected company, founded in Nova Scotia, is now one of Canada's largest and most trusted providers of technical expertise to the cable, telecommunications, and security industries. What began as a small family business quickly expanded to a national brand, with ten offices across the country, offering wired and wireless infrastructure, access control, and security solutions, all supported by a highly skilled mobile workforce, 7 days a week.

With an enviable workplace culture that focuses on safety, integrity, quality, and wellness and that encourages employees to realize their full potential through education, professional development, and advancement opportunities, Frontier Technologies enjoys the loyalty and commitment of many long-term employees.

"Our passionate and talented team of professionals has a keen focus on continued growth, and has provided Frontier with the unique ability to evolve and adapt to changing market conditions and industry fluctuations," says President and CEO Rod Kerr. "I'm proud that our company has made a positive impact, in both business and the community. We look forward to continuing to serve our valued customers for many years to come."

About Kerr Group:

With a well-earned reputation for exceptional service, the Kerr Group is Atlantic Canada's largest cable/telecommunications support and fleet optimization company. In addition to Frontier Technologies, the Kerr Group also operates Northern BI, which offers business intelligence to Canadian companies in the form of GPS fleet tracking solutions, electronic timesheets, expense workflow tools, and route optimization platforms that provide customers with custom dashboard and reporting systems.
